

Appl. No. 09/891,976; filed 6/26/01
Inventors: Hamzeh Karami et al.
Amdt. dated July 15, 2004

REMARKS

By amendment above, applicants are correcting the priority claim and updating the status of the applications to which priority is claimed.

The application as originally filed made reference on page 2 under "Related Applications" to two earlier filed U.S. applications (see Appendix A). More particularly, page 2 of the specification stated that the current application is a "continuation-in-part of application serial number 09/797,334, filed March 1, 2001, which is, in turn, continuation-in-part of application serial number 09/097,198 filed June 2, 1998, the disclosures of which are fully incorporated herein by reference." A copy of the filing receipt for the subject application is also enclosed as Appendix B.

By amendment hereinabove, we have eliminated the incorrect priority claim to Application No. 09/097,198, filed June 2, 1998, which has no inventors in common with the subject application. We have also updated the status of Application No. 09/797,334 to indicate its "abandoned" status.

If any extension of time fee is deemed necessary to preserve the pendency of the subject application, authorization is hereby given to charge any such fee to Deposit Account No. 01-1785.

Respectfully submitted,

APPENDIX A

RELATED APPLICATIONS

This application is a continuation-in-part of application serial number 09/797,334, filed March 1, 2001 which is, in turn, continuation-in-part of application serial number 09/097,198 filed June 2, 1998, the disclosures of which are fully incorporated herein by reference.

OFFICE OF PETITIONS**FIELD OF THE INVENTION**

The present invention relates generally to a method of making absorbent articles with wings (flaps) and is particularly related to a method of attaching wings to the chassis of an absorbent article. In one specific aspect, the present invention relates to a method of attaching wings to the chassis of an absorbent article by a continuous method which is suitable for commercial production. In another specific aspect, the present invention relates to such method for formation of T-shaped absorbent articles.

BACKGROUND OF THE INVENTION

Absorbent articles such as diapers, incontinent undergarments, sanitary napkins and the like are widely used in various homes, hospitals and health care institutions. Typically, an absorbent article such as, e.g., a diaper, comprises a chassis defined basically by a liquid permeable topsheet, a liquid impervious backsheet and an absorbent sheet or layer sandwiched between the topsheet and the backsheet. Sometimes, the chassis may also include an acquisition layer disposed between the topsheet and absorbent sheet and one or more other layers for one purpose or another. The chassis itself has a front waist section and a backwaist section, the waist section being somewhat flared so that the flared portion may be wrapped around the torso of the wearer, and fastening means or adhesive strips are used to secure the flared portions (wings) together.

OFFICE OF PETITIONS

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).

OFFICE OF PETITIONS

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related application(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

PLEASE NOTE the following information about the Filing Receipt:

- The articles such as "a," "an" and "the" are not included as the first words in the title of an application. They are considered to be unnecessary to the understanding of the title.
- The words "new," "improved," "improvements in" or "relating to" are not included as first words in the title of an application because a patent application, by nature, is a new idea or improvement.
- The title may be truncated if it consists of more than 500 characters (letters and spaces combined).
- The docket number allows a maximum of 25 characters.
- If your application was submitted under 37 CFR 1.10, your filing date should be the "date in" found on the Express Mail label. If there is a discrepancy, you should submit a request for a corrected Filing Receipt along with a copy of the Express Mail label showing the "date in."
- The title is recorded in sentence case.

Any corrections that may need to be done to your Filing Receipt should be directed to:
